## Noga Head Office

### **NOGA ENGINEERING & TECHNOLOGY (2008) LTD**

Noga Engineering and Technology was established in 1980. Over the years the company has grown to become the world leader in the manufacturing of three main lines:

**Deburring Systems** Holding Systems Cutting Fluid Applicators

Noga's strongest points are product design and development, quality and service. Our products are sold in more than 60 countries either through our own companies or a network of exclusive agents.

All NOGA products meet the strict requirements of ISO 9001 and ISO 14001.

We invite you to visit our web site: www.noga.com for further information.

NOGA reserves the right to make changes in any of its products without prior notice.

#### Introduction

**NOGA** is proud to present its new catalog of holding systems.

These state of the art mechanical holders, are divided into two groups, ARTICULATED and PH, both designed to hold dial and test indicators, as well as many other components.

**NOGA** holders are also used in many other fields such as: machine construction, medical instruments, photography, light, sound and more.

NOGA holders consist of three main parts: Arms, base and top (See diagram on right).

**NOGA** ARTICULATED HOLDERS - articulated arms, with central locking mechanism.

**NOGA** PH HOLDERS - post and arm, with unique 3 points clamp.

Each group of holders consists of several sizes of arms, so you can always find one to suit your needs.

**NOGA** holders have fine adjustment mechanism, whether it is on the top (FAT), or at the base (FAB) or both.

**NOGA** top fine adjustment is made of metal, and is the only fine adjustment to hold 6mm, 8mm, 3/8" and dove tail.

**NOGA** SPECIALTY HOLDERS - unique individual items. These are Noga well known items.

**NOGA** SETS - 3 sets of holders and indicators.

**NOGA** BASES - different magnetic bases from 200 N to 1300 N, a 350 N vacuum base, and clamps.

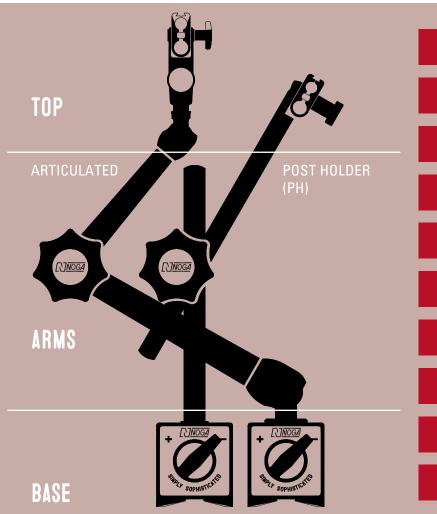

**NOGA** MODULAR HOLDERS - another useful addition to this catalog is the modular holders section which allows the user almost unlimited range of holding applications.

**NOGA** Accessories - A variety of accessories are shown. Custom made accessories are available upon request.

# Choosing the Right Holder

- Choose the kind of arms needed articulated or PH (Post Holder).
- When zero-setting is very important, use fine adjustment at base (FAB). In all othe cases use fine adjustment on top (FAT).
- Decide what kind of base you want. Magnetic, vacuum or others.
- Depending on the type of indicator and job to be inspected, choose either standard clamp or NOGA fine adjustment with unique swivel clamp.
- Consult the relevant section in this catalog to choose the right holder.

#### **Quick Release** AD4000

Enables a quick change to the equipment without having to fiddle with screws and threads.

Simply pull back the red sleeve and slot in the Noga arm into the Quick Release attachment

Quick Release can be held by a range of Noga arms.

Features bottom external thread M6 and top external thread 1/4" UNC.

# Cooling Systems cutting fluid applicators

## Contents

NOGA Cutting Fluid Applicators were designed to answer various needs for cooling during machining, turning, drilling tapping etc. They are made in four different designs:

MINICOOL 115-116

MINICOOL have air and liquid mixture forms a fine spray that cools all metal cutting operations.

FIXED & VARI HP (HIGH PRESSURE) COOL

The Fixed HP Cool Arm and Vari HP Cool arms deliver fluids or cooling liquids at high pressure, up to 1000 PSI, allowing a higher level of machining. Easy and fast to set in position. Can be fitted with different sizes of nozzles.

NOGACOOL 119-120

The NOGACOOL consists of a manifold and flexible Loc-Line® hose held by a magnet. It is used to easily direct cutting fluid from the coolant pump of machine tools towards the cutting area.

COBRA 121-125

The COBRA drop-ejector shoots small quantities of liquid towards a distinct target. Various options enable the user to apply either single drops, or spray burst, or an air stream with small amounts of liquid.

117-118

## MiniCool

**NOGA MINICOOL** uses the VENTURI principle to spray an air and liquid mixture. It consists of the following basic parts:

A control valve, spray unit, air line, syphon line and a powerful on/off Popeye magnet, which has a "V" form base, making it possible to mount on non-flat surfaces.

The MINICOOL enables the user to easily control both the air flow rate and liquid rate.

Stainless steel armoured syphon hose and air hose are made in a standard one meter length (special lengths available upon request).

The spray unit comes in three standard lengths: 264, 334, 479 mm (special lengths available upon request).

## Fixed & Vari HP Cool Arms

**NOGA** is introducing its patent pending newest product to the Cooling Systems line.

The Fixed HP Cool Arm and Vari HP Cool arms deliver fluids or cooling liquids at high pressure, up to 1000 PSI, allowing a higher level of machining.

Easy and fast to set in position.

Can be fitted with different sizes of pozzles.

**NOGACOOL** consists of a manifold & Loc-Line® flexible hose with a nozzle on top and a valve at the bottom, assembled on the powerful on/off Popeye magnet.

The plug attached can be replaced by a second Loc-Line® flexible hose.

**NOGACOOL** is supplied with a set of three nozzles: 1/16", 1/8" and 1/4".

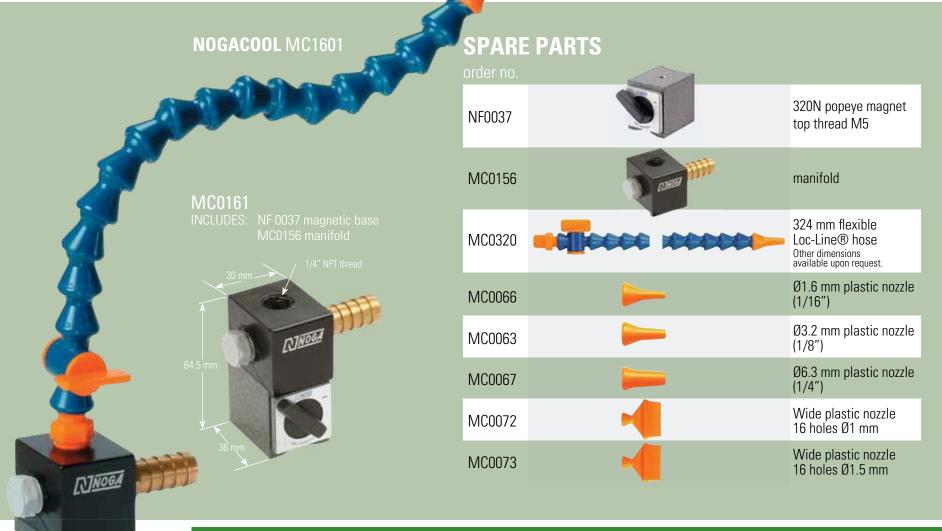

Working conditions are as follows:

- Pressure: 2-3.4 Bar (30-50 Psi
- Flow rate: 940 I/hour (250 gal/hour
- Max. working temp. 170°C

Also available with magnet and manifold only (order no. MC0161

## Cobra

**COBRA 's** drop ejector is designed to accurately shoot small quantities of liquid to distinct targets. An air actuated piston shoots the drops through a flexible hose onto the target.

The drop shots can be automatically timed or manually determined by the user, the amount of liquid in each shot can also be adjusted by a tuning screw at the back of the COBRA all according to the user's needs.

The COBRA is operated by clean air pressure 3-9 bar. Most liquids and solvents up to 250 cst viscosity can be applied.

# Operating Instructions

The fluid can supplied either by fitting the bowl (CB0146) directly onto the unit or by using the large container (CB0147) and connecting it to the unit by 4 mm hose. Set up the pneumatic circuit as shown in one of the drawings (a) or (b) or (c). All connections are to be made with 4 mm hose.

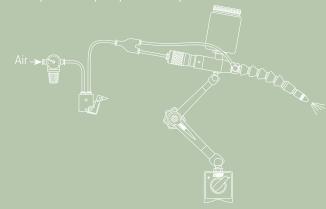

Open drop size control nut "S" to maximum drop size. Start pulsing the unit by pressing the actuating valve many times until drops emerge.

Adjust the drop size to your needs. If you have set up the circuit according to drawing (b), or (c), adjust the air flow with the nozzle nut "T".

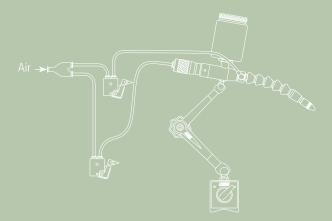

**a.** Setup for single drops using mechanical valve

**b.** Setup for finely dispersed droplets.

**c.** Setup to supply drops and air jet independently
